

Homework Expectations

Daily homework assignments are extremely important in reinforcing the concepts that we explore in class.

- I. In order to receive full credit on homework checks (remember that homework counts for 10% of your overall grade), you must meet the following criteria:
 - a) You must attempt all problems that are assigned - you have to have something intelligible written down in order for me to believe that you tried the problem. A "?" is NOT considered intelligible.
 - b) You must show work that supports your answer - I will not give credit for problems where only the answer is shown.

- II. Homework checks will be conducted in the following forms:
 - a) A quick scan of the entire assignment.
 - b) A check of one particular problem from the assignment that I will pick ahead of time. Of course, you won't know which one!

- III. We will go over any questions on the homework assignment the day it is due. Be prepared with questions when you come in to class! Please come for extra help if you still don't understand a certain type of problem that we have spent class time discussing.
